SIMIO *accelerate*

Enterprise-Level Donor Intelligence for Every Nonprofit

The most successful fundraisers don't rely on instinct. They use data to identify who will give, who will lapse, and where to focus.

Our clients have seen:

+85% *response rate*

x2 *major donors*

+50% *average gift*

Until now, that level of insight has been out of reach for most nonprofits, requiring complex infrastructure, data science teams, and long implementations. SimioAccelerate changes that. Sign up for free, upload your donor file, and the agentic AI gets to work immediately.

What SimioAccelerate Delivers

SimioAccelerate is built on SimioCloud, Moore's industry-leading cooperative donor dataset. It benchmarks your donor data against over 120 million individual donors and billions of transactions nationwide.

It goes beyond insight. Purpose-built AI agents connect your donor data with SimioCloud intelligence, identifies high-value prospects, recommends a plan of action, and automates the outreach.

What Makes It Different

Agentic AI that drives action
AI agents identify opportunities, prioritize focus, and craft your next steps for speed and efficiency.

From data to execution in one workflow
Intelligent audiences, insights, and outreach come together in a single platform.

Powered by national-scale donor intelligence
Benchmark against the largest nonprofit cooperative dataset.

Built for small and mid-sized nonprofits
Access advanced donor intelligence without complex infrastructure or data science teams.

Core Capabilities

Donor Intelligence
Identify high-value prospects, upgrade opportunities, and lapse risks using predictive modeling.

Audience Optimization
Identify the donors most likely to respond for optimal return on investment.

Campaign Generation
Generate AI-assisted, editable email drafts aligned to donor potential and giving history.

Guided Fundraising Decisions
Receive clear direction on where to focus and what actions to take based on donor signals and modeled insights.
